Abstract (Basic): JP 11138521 A

NOVELTY - The base plate is provided on the side of each protractor board (42). The side plate is provided on the side of each base plate. The end plate (146) is moved vertically corresponding to the position of the side plate. DETAILED DESCRIPTION - The shaft support is installed on the base table (4). The central shaft (40) is provided on the upper edge of the shaft support. The protractor board (42) is positioned rotatably on either sides of the central shaft. Each of the protractor board is supported by a protractor board support (20). The adjustment tool (100) adjusts the angle of each protractor board individually.

USE - For construction of shore walls.

ADVANTAGE - Enables manufacturing formwork of required length, hence reducing number of formwork used, shortening working time.

DESCRIPTION OF DRAWING(S) - The figure shows isometric view of formwork. (4) Base plate; (20) Protractor board support; (40) Central shaft; (42) Protractor board; (100) Adjustment tool; (146) End plate.

Patent Details:

Patent No	Kind	Ln	Pg	Main IPC	Filing Notes
JP 95048992	B2	6	A23L-001/305	Based on patent JP 3297364	

Abstract (Basic): JP 3297364 A

Antithrombogenic powder compsns. comprise (A) fats and oils contg. at least 10 wt.% of eicosapentaenoic acid and docosahexaenoic acid and/or fats and oils contg. 20-70 w.% of alpha-linolenic acid, (B) 2-20 w.% of lecithin, and (C) 20-70wt.% of protein and/or its hydrolysate.

USE/ADVANTAGE - The compsns. are pharmaceutically useful for prevention and treatment of arteriosclerosis such as cerebral infarct, myocardial infarction, and angina pectoris. They are stable for a long period and easy to feed. The fats and oils are derived from sardine (*Sedum iwarenge*), herrings, mackerels (*Scombrina*), etc., and those of the latter fats and oils are derived from *Perilla frutescens crispa*. The lecithin may be a mixt. of phosphatidylcholine and phospholipids, and is derived from soybean, egg, seed of *Helianthus annuus*, etc. (8pp)
